Project Overview

Project area
25.920 M²

The project was built and developed under the supervision of two of the strongest and largest construction companies in Turkey.

A residential and investment project located in Bahcesehir district on the European side of Istanbul, within a quiet and upscale residential neighborhood.

The project is built on a land area of 25.920 square meters.

Project Overview

The project consists of 8 blocks, and the project includes 465 apartments and 34 stores, designed in a distinct style and with a unique perspective.

The project offers the following apartment options: 1+1, 2+1, 3+1, 3.5+1, 4+1, and 4.5+1.

This project is designed and planned to protect you and your loved ones based on a modern technological safety method.

In this project you will experience joy and luxury together, and you will feel comfortable and satisfied.

Everything you need for your well-being and to have a good time will be available to you in this project.

Project Overview

The project being built, in the midst of the most ideal housing destinations such as Bahcesehir, shines with its central location and unique landscape.

The project includes comprehensive social services and facilities such as a fitness center, sauna, sports facilities, children's playground and recreational areas.

Gardens and landscape areas are specially designed in Bahcesehir project.

Project Overview

The large swimming pool created between the gardens creates a very entertaining social area for children and adults alike.

Also, in the project there is a closed car park for each apartment.

In this project, many details have been considered to provide a comfortable life for both children and adults, and the site has been organized near cinemas, shopping malls, clinic and schools.

Project Site

The project is located in Bahcesehir district on the European side of Istanbul.

Bahcesehir has become a popular district as this district has made a name for itself with its luxury housing projects.

Bahcesehir is an increasingly valuable district of Istanbul, located at the intersection of highways and new transportation lines.

The distinctive location of the project, where access roads to the third bridge and the third airport reach the area, and the subway will extend all the way to this project soon.

The strategic location of the project in European Istanbul, specifically in Bahcesehir area, near the TEM highway.

Project Site

Perhaps what gives this project additional importance is its location in Bahcesehir, a very promising area in the field of real estate investment. Why not, which includes the roads to the Yavuz Selim Bridge, which facilitates transportation outside Istanbul, and on the other hand, the area includes highways that facilitate its residents to reach anywhere within Istanbul, and most importantly, it is considered one of the closest areas to Istanbul's third new airport, which was opened in the month October of 2018.

We must not overlook the role of the metro station, which will be established soon in the area, which will definitely lead to a rise in real estate prices, as it will save you time and effort to move between the different areas of Istanbul.
