Project Overview

The project's privileged location in the heart of the city is getting more valuable every day.

Standards of quality and a sense of confidence within highly useful and elegant living spaces designed by Walter Knoll.

The project has been awarded two categories in the European Property Awards.

Project

Overview

The project includes two office blocks with 119 apartments, in addition to the 173-room Four Points by Sheraton hotel and 38 shops on the street giving the feel of a small area in Istanbul.

The project contains 108 residences and 11 executive apartments in 12 different types, providing its residents with an efficient and quality daily life.

Easily access to all city centers rather than being in the city center is the most important component of a real estate project today.

The project is directly and quickly connected to the whole of Istanbul, with effective direct access to the roads in Istanbul.

Being within walking distance of the metro station where the two most important metro networks intersect, this project offers a very high investment value today and in the near future.

Project

Overview

All these things have been gathered in one project to offer you everything you would expect from Istanbul in the best possible way.

The parameters of both work and everyday life have been redesigned in this project.

The project consists of 4 blocks with a total built-up area of 105.000 square meters on Cendere Street in the middle of Kagithane district, redrawing the quality and standards of living.

The project, which includes offices, residences, hotels, food and beverages and shopping, which are the most important elements of our daily life, takes the area to another level in the real estate market in Istanbul.

While it offers a bright and spacious 300 meter facade of Cendere Street, a private living space has been created in the project with its inner streets.

Project

Overview

In addition to the convenience of street shops and catering areas within the project, many schools, universities, hospitals, shopping malls, concerts and entertainment centers that can be reached within 5 kilometers make daily life more efficient.

Apartments are ready to provide you the life of your dreams with carefully designed details, smart home systems and ready-made air conditioner infrastructure.

Your expectations of comfort are met with 6 high speed OTIS elevators for up to 17 people and storage areas on the same floor of the apartments.

The project offers a very spacious living space for its residents with an all-glass facade and a net ceiling height of 2.8 meters.

The private balcony on the tenth floor offers a new understanding of social life, where a very pleasant environment awaits you with communal work areas and tea and coffee services.

Project Site

The project is located in Kagithane area, the fastest developing and valuable area of Istanbul. Kagithane district, which has become the increasing value of Istanbul with the recently realized projects and investments, is developing and gaining value day by day.

It has become one of the indispensable points of Istanbul with its location which provides direct and quick access to the most important elements of Istanbul's daily, social and commercial life through the main arteries.

The project is located in Kagithane district, which is the closest area to the European center of Istanbul.

With easy access to shopping centers, and Kagithane station of the M7 metro line, the project gains an indispensable location for both tourists and citizens of Istanbul, in the heart of the near future.

Project

Site

Kagithane is one of the most important areas that attract real estate investors because of its central location in the heart of Istanbul.

Kagithane is characterized by the availability of major service Yavuz Sultan Selim Bridges and the availability of public transportation.

The project Yavuz Sultan Selim Bridge is characterized by its proximity to universities and educational institutions.

Lots of international schools, universities and hospitals are located around the project.
